NURUL FAJRI

Full-stack Developer

phone: +62 878 3755 4403   email: n.fajri@outlook.com

I have been interested in Software Development since 2017, so my hobby is exploring new things related to technology. I have over 4 years of experience in software development and junior in web3 development. I am a person who quickly adapts to new things, can work in a team, is solution-oriented and has good stress management when there are work-related problems.

I'm currently developing a lot of boilerplate/starter applications on the frontend and backend whose repositories are Open Source and under MIT license. It can be accessed at https://github.com/masb0ymas.
My CV can also be seen on the following website: https://www.masb0ymas.my.id

The following is a summary of my educational history, work experience, project portfolio and technical abilities.

Experience

Software Engineer
Moneyflow ID - Self-employed
June 2023 - Present
Jakarta, Indonesia

My first internet product with a subscription type, this application only focuses on cash flow, both from recording income, expenses, budgeting and reporting every month. This application is equipped with a feature to scan grocery receipts and find out your income or expenses.

Software Engineer
Trasmi Broker - Full-time
August 2022 - Present
Jakarta, Indonesia - Hybrid

I rebuilt the insurance broker system from scratch again, because the old system could not be maintained well. The broker system that I created only helps brokers in cross checking data from bank to insurance and vice versa.

Software Engineer

Karcisbola - Full-time
April 2021 - November 2023
Jakarta, Indonesia

I built a ticketing & raffle system from scratch on the Karcisbola application, including a payment gateway, but the ticketing system is not yet fully used. I also researched many clouds to reduce costs in terms of deployment, both staging and production.

Nusantech

Full-time

Full-stack Developer

September 2020 - April 2021

The first time I worked at this company, I played the role of Backend Developer, this company operates in the Software House sector for private and government companies. with the many applications created, I developed many skills learned, both from the Backend, Frontend and DevOps side.
